Highlights

Full breakfast set

A breakfast set designed for what truly counts. Discover the full set with matching drip coffee maker and toaster.

Flat heating element

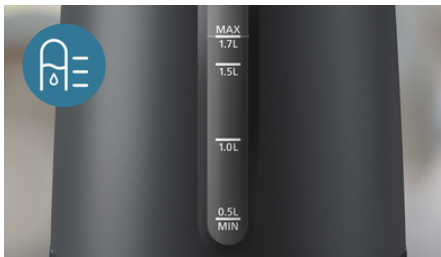

Enjoy fast boiling and effortless cleaning with the concealed, stainless steel heating element - the perfect blend of speed and convenience for your favorite hot drinks.

Boil-dry protection

Don't worry about a thing. Our kettle shuts itself off automatically when your water has boiled to avoid overheating.

Water level indicator

The convenient water level indicator lets you boil precisely the right amount every time to save water and energy.

Removable filter

Every sip is free from impurities and water scale. Take your favorite hot drinks to the next level, where every pour promises flawless taste.

Easy refilling

Open the lid at the touch of a button or simply refill through the spout if you prefer.

360° pirouette base

Our cordless kettle rests on a 360° pirouette base for effortless lifting and replacing.

On/Off light

The handy on/off indicator glows to let you know your kettle is working and shuts off to see when you're ready to pour.
